EDUCATION_____

DePaul University

Degree anticipated Spring 2023

BS – Computer Science

TECHNICAL SKILLS_____

Proficient in Languages & Libraries: React, JavaScript, SCSS, CSS, HTML, Bootstrap

Intermediate Understanding of Languages, Frameworks, Libraries & CMS: Java, Styled Components, MySQL, WordPress

Tools and Utilities: Git

TECHNICAL PROJECTS_____

E-Commerce Clothing Site | View Live | View Code | Built with: React, SCSS   *See additional projects*

- An online clothing store created with React with User Experience in mind by utilizing a minimalist approach. This project includes various components common to E-commerce sites such as a cart, checkout, wide array of products, and more.

Employee Search & Hire Site | View Live | View Code | Built with: React, SCSS, External APIs

- Project utilizes API Fetches to gather employee information, displayed in detailed employee cards containing basic employee information given during the hiring process. Users can utilize the "find bots" button to fetch new employees.

Food Ordering Site | View Live | View Code | Built with: HTML5, CSS3, JavaScript, Bootstrap

- Built a functional food ordering service that: stores user data, adds item to order, updates current total, calculates subtotal, calculates tax, and displays order details via modal window. This project will be recreated in React with additional features soon.

Portfolio Site | View Live | View Code | Built with: HTML5, CSS3, Bootstrap

- Custom built site to showcase my current projects and various contact options. Included within the site: 3 projects, contact me form, LinkedIn URL, GitHub URL, and downloadable resume. This portfolio site will see new additions over time.

WORK EXPERIENCE_____

Specialty Finishing Group - Shipping and Receiving Clerk – June 2018 – March 2022 - More Details - LinkedIn

Ignite Graphics - Shipping and Receiving Manager – November 2016 – May 2018 - More Details - LinkedIn

- Collaborated daily with multiple departments to develop strategic plans to meet customer needs.
- Implemented new warehouse shipping procedures and reduced shipping processes by 20% through necessary changes to the Bill of Lading process.
- Maintained accurate documentation of inventory by uploading received quantity into FileMaker.
- Trained new employees on shipping procedures and receiving protocols.
- Reduced costs on carrier expenses by using a local driver for urgent local deliveries.
- Increased shipping times by 40% through implementing automation of FedEx and UPS labels.

Skills learned: Problem-solving, teamwork, collaboration, time management, communication, critical thinking, project management, department management, and adaptability.

BILINGUAL_____

Polish **-** Fluent proficiency level
